DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-36, 46-47 drawn to sol gel fiber device/method of making classified in class 385 subclass 123+.
- II. Claims 37-45, 48-49 drawn to method of using porous sol-gel fiber/sensor classified in class 385 subclass 12.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case product as claimed can be used in a materially different process of using that product such as in the numerous examples of sensors which delineate different methods of sensing with sol gel fibers, e.g., using the sol gel sensing fiber(s) for controlling chemical injection in surface treatment systems.
